1. The following is an examiner's statement of reasons for allowance: Applicants have amended their claims to limit A to be unsaturated alkyl group, thus obviating 35 USC 102 and 103 rejections over FR'019. Another reference of relevant art is Rano et al (Tetrahedron Lett, 1995, which teach structurally similar compounds as claimed in claim 15. However there are few differences. In the reference, Br is 4-substituted as against 3-F in herein. The compound in the reference is benzenepropanamide, whereas in herein it is 2, N dimethyl propionamide or 3,4, difluoro propionamide. There is no motivation to modify the reference structure to arrive at the claimed compounds, as the utilities are different, hence claimed compounds are patentable. Inasmuch compounds are patentable, process of making is patentable too. In re Ochiai 37 USPQ2d 1127.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
